## EXPERIENCE

### Walmart Global Tech Sunnyvale, CA – *Software Engineer III*

JAN 2023 - NOW

- Contributed to design and development of large-scale web platform including frontend & backend, supported with Cross-Browser Compatibility, User Experience and Performance Optimization.
- Involved in Next.js app development and built reusable web components, UI components and integrating headless CMS, as well as web accessibility and server-side rendering.

### Assurant Ithaca, NY – *Software Engineer, Front End (Co-op)*

AUG 2021 - MAY 2022

- Lead development of UI component library for E-Commerce Platform using React, Next.js, Scss, TypeScript, and Storybook.
- Managed the web design for the Assurant E-Commerce Platform online sales flows, through research and prototyping.

### Kingsoft Zhuhai, China – *Software Engineer, Front End*

JUL 2020 - JAN 2021

- Collaborated with project management to interpret business goals and optimize the user experience on web applications.
- Developed and designed features logic, component layouts, advertising portals, and RESTful APIs, resulting in a 25% increase in engagement.

### Ford Motor Co Lansing, MI – *Software Engineer (Co-op)*

AUG 2019 - DEC 2019

- Lead the development of Ford Mobility Product Metrics, including a multi-platform chatbot and web metrics dashboard with pixel tracker
- Created an online chatbot using Node.js for Slack and WebEx Teams to communicate with users and send weekly data analysis reports.
- Integrated Grafana dashboard based for data monitoring and visualization.

## PROJECTS

### VibesMedia – *Software Engineer, Full Stack*

- Developed a social platform using MERN stack (MongoDB Atlas, Express.js, React, Node.js) with client and server side functionality.
- Implemented user register/login with JWT, allowing users to edit profiles, post text and images, add friends, and like/comment on posts.

### Facipe Web App – *Software Engineer, Frontend*

- Created a platform to help users save money and prevent food waste by generating recipes based on fridge contents, fully responsible design.
